1. Charging Your Device
   - Choose the cable which is compatible with your device. The TYLT ENERGI will work with any standard USB cable.
   - Plug USB cable into the TYLT ENERGI.
   - *Cable not included*

2. Checking Battery Capacity
   - Press and release the Power button to check battery capacity.
   - 1 LED = 0 - 20%
   - 2 LED = 20 - 50%
   - 3 LED = 60 - 80%
   - 4 LED = 80 - 100%
   - Pull the AC prongs down to flip it open.

3. Charging the ENERGI
   - Plug the TYLT ENERGI into the wall socket.

4. Connecting the ENERGI
   - Plug the connector into your device. Press the Power button to start charging.

You can also use the built-in Lightning arm to charge your device without the need for a USB cable. Simply connect the Lightning arm to your phone and press the Power button to start charging.

If two devices are connected to the ENERGI at the same time, both devices will charge simultaneously.

Specifications:
- Battery Cell: Li-Ion Polymer
- Battery Capacity: 3000mAh
- Output Voltage: 4.95 - 5.15V
- Output Current: 1.0 Amp
- Battery Charging Time: 5.5 hours
- Dimensions: 17 x 65 x 23 mm
- Weight: 85 g

Warning:
- Do not disassemble.
- Do not immerse in water.
- Do not store near a heat source above 105°F.
- Do not short circuit.
