1. **Charging Your Device**

Choose the cable which is compatible with your device. The TYLT ENERGI will work with the included Micro-USB cable or any other USB cable you may have on hand.

2. **Checking Battery Capacity**

Press and release button to check current battery capacity.

- **1 LED = 0 - 20%**
- **2 LED = 20 - 50%**
- **3 LED = 50 - 80%**
- **4 LED = 80 - 100%**

Note: For accurate results, please ensure there are no devices connected to the TYLT ENERGI.

3. **Usage**

Charge two devices simultaneously even when no AC outlet is available.

4. **Specifications**

- **Battery Cell**: Li-Ion Polymer
- **Battery Capacity**: 1,800mAh
- **Dimensions**: 77 x 65 x 23 mm
- **Output Voltage**: 4.75 - 5.25V
- **Output Current**: 1.0 Amp
- **Battery Charge Time**: 5 - 6 hrs
- **Weight**: 3.8 oz.

**Warning:**

Do not disassemble. Do not immerse in water. Do not store near a heat source above 110°F. Do not short circuit.
