PORTABLE BATTERY

CHARGING THE PORTABLE POWER 10X

Plug the included micro-USB cable into the micro-USB input port. Connect the other end of the cable to any USB power source such as a home or car charger*.

To rapidly charge the 10X, you can connect two inputs simultaneously (Dual Fuel Technology) to the micro-USB and USB-C ports. For fastest results, use a 2A charger for each port.

CHECKING BATTERY CAPACITY

Press the power button to determine the amount of charge left within the 10X. The 4 LEDs will light up in 25% increments. Solid LEDs indicate it is within that power range. 4 illuminated LEDs indicate that the 10X is fully charged.

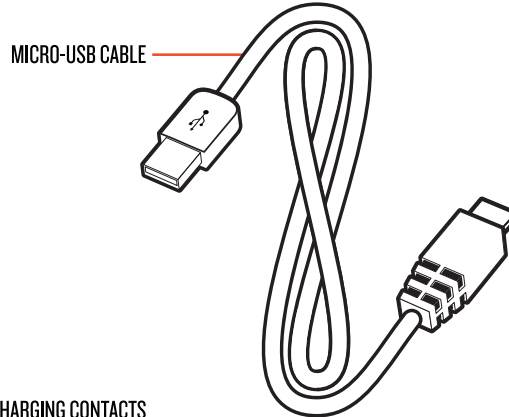

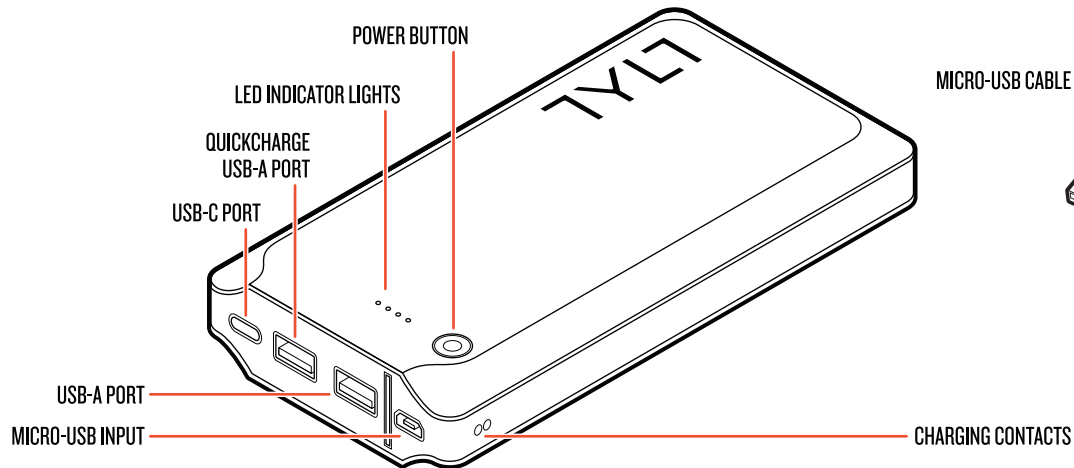

LED indicators:

1 LED 0~25%

2 LEDs 26~50%

3 LEDs 51~75%

4 LEDs 76~100%

SPECIFICATIONS

Battery Cell: Li-ion Polymer

Battery Capacity: 20,100 mAh

Output Voltage: 5-20V

Output Current: 6A

Input Current: 4A

Battery Charge Time: 6hrs

Dimensions: 6.5 x 3.25 x 0.9"

Weight: 13.23 oz

PORTABLE BATTERY (CONT)

CHARGING DEVICES (QUICKCHARGE USB PORT)

Choose the cable that is compatible with your device. The 10X will work with the included micro-USB cable or any other USB cable you may have on hand. Plug the USB cable into the 10X. Plug the other end into your device and press the power button to start charging. Note: You must use a data cable to take advantage of the fast charging speeds.

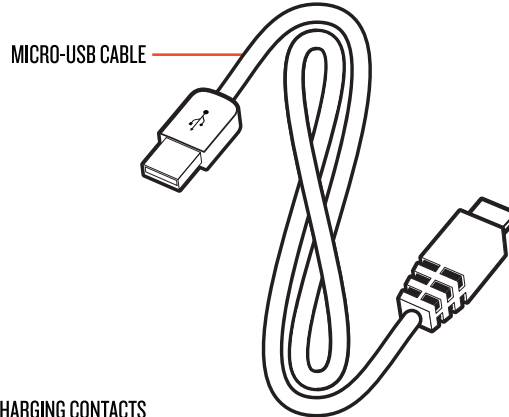

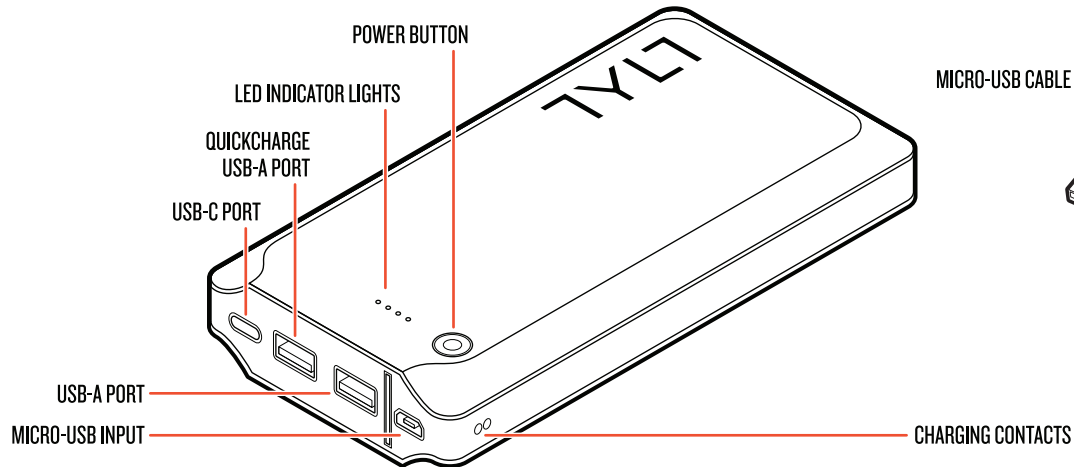

CHARGING DEVICES (USB-A PORT)

Choose the cable which is compatible with your device. The 10X will work with the included micro-USB cable or any other USB cable you may have on hand. Plug the USB cable into the 10X. Plug the other end of the cable into your device. You may need to press the power button to start charging.

CHARGING DEVICES (USB-C PORT)

The USB-C port is capable of Power Delivery (PD). It can rapidly charge tablets and laptops with up to 45W of power. Plug one end of a USB-C cable into the 10X and the other end into your device. You may need to press the power button to start charging.

When charging the 10X and a device simultaneously, the 10X must be at least 40% charged for the device to start charging. For best results, use a power supply rated at 2A.

WARNING

- Do not disassemble.
- Do not immerse in water.
- Do not store near a heat source above 120°F.
- Do not short circuit.
